## ABOUT ME

I am passionate about programming and technology, constantly acquiring new knowledge and applying it to personal projects. I consider myself a self-taught individual with the goal of transitioning my skills into a professional environment. My current aim is to expand my expertise to seek job opportunities as a developer, where I can effectively apply my skills and contribute to the growth of a team.

2023

## PROFESSIONAL EXPERIENCE

**Developer fullstack**

Kuarctech Solutions - (September 2023 a present)

During this period up until now, I have worked on custom software development using Angular and .Net as frameworks, and on the creation and structure of an SQL database using PostgreSQL, as well as a graph database using Neo4J. I also worked on the design and integration of various platform screens in the frontend and their logic in the backend.

- Experience in the Scrum framework.
- Experience using various tools such as Jira, Confluence, BitBucket, Trello, and Slack.
- Experience working in different development environments.
- Experience working with servers.
- Experience in WebSocket architecture and ApiRest.ized.
