Passionate and self-taught programmer with experience as a Software Developer. I have participated in the development of various platforms, contributing to both frontend and backend. My responsibilities have included implementing functionalities, structuring databases, and integrating user interface designs.

PROFESSIONAL EXPERIENCE

KuarcTech Solutions   *September 2023 - January 2025*
FullStack developer

- *Development of custom software using various platforms and technologies, with Angular and .NET as the main frameworks.*
- *Design and structuring of databases, including the implementation of relational databases with PostgreSQL and graph databases with Neo4J.*
- *Frontend and backend development: I participated in the design and implementation of user interfaces (UI) and backend logic to ensure optimal platform performance.*
- *Experience working with WebSocket-based architectures for real-time applications and in the development of RESTful APIs for system integration.*
- *Advanced use of Jira, Confluence, BitBucket, Trello, and Slack for project management, documentation, and team communication.*
- *Configured servers on AWS and managed platform deployments to ensure proper implementation and functionality.*
- *Work within the Scrum framework, actively participating in sprints, daily stand-ups, planning sessions, and retrospectives.*

EDUCATION

UNIVERSITY HISPANOAMERICANA
Computer Engineering   *January 2024-Present*

NATIONAL LEARNING INSTITUTE
Informatic Application Programming Technical   *April 2022-December 2023*
